Memoria Watch Names

Amare: (Love) loving and preserving memories

Lux: (Light) where time and memories merge

Memoria design

The hour markers on the dial are inspired by timeless "menhir stones," symbols of continuity and remembrance. Just as these millennia-old stones remain unchanged, these details remind us that precious moments always stay with us. They represent the connection between past, present, and future, and with our watches, we carry this valuable connection with us.
